

# Getting the « Reference Vertex »

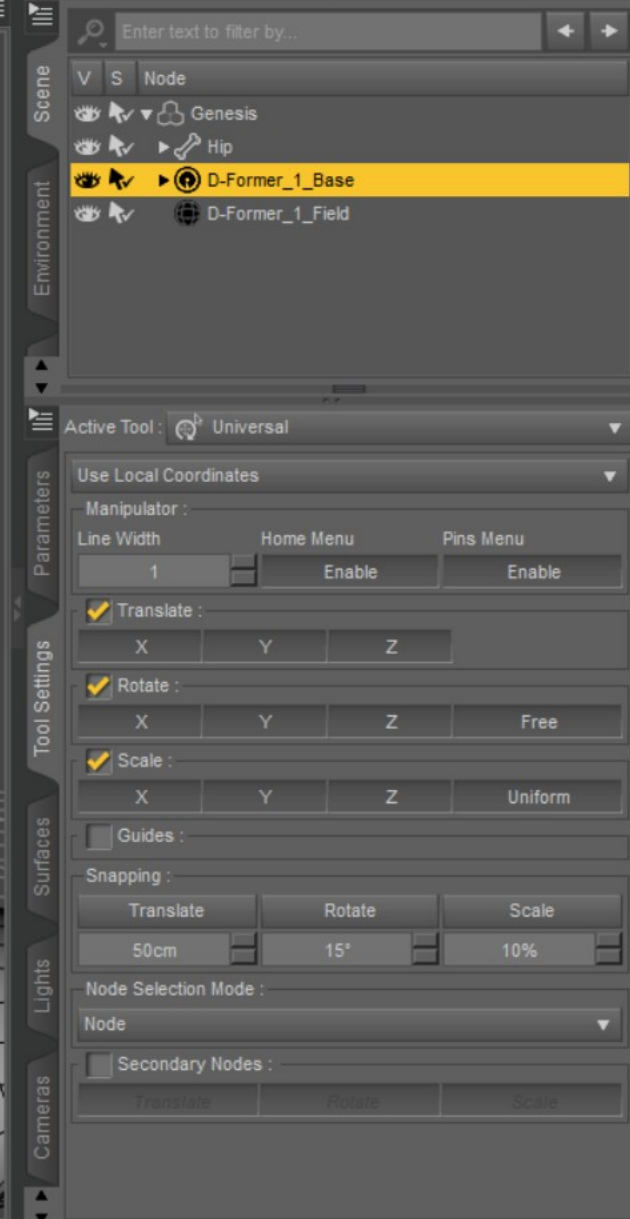

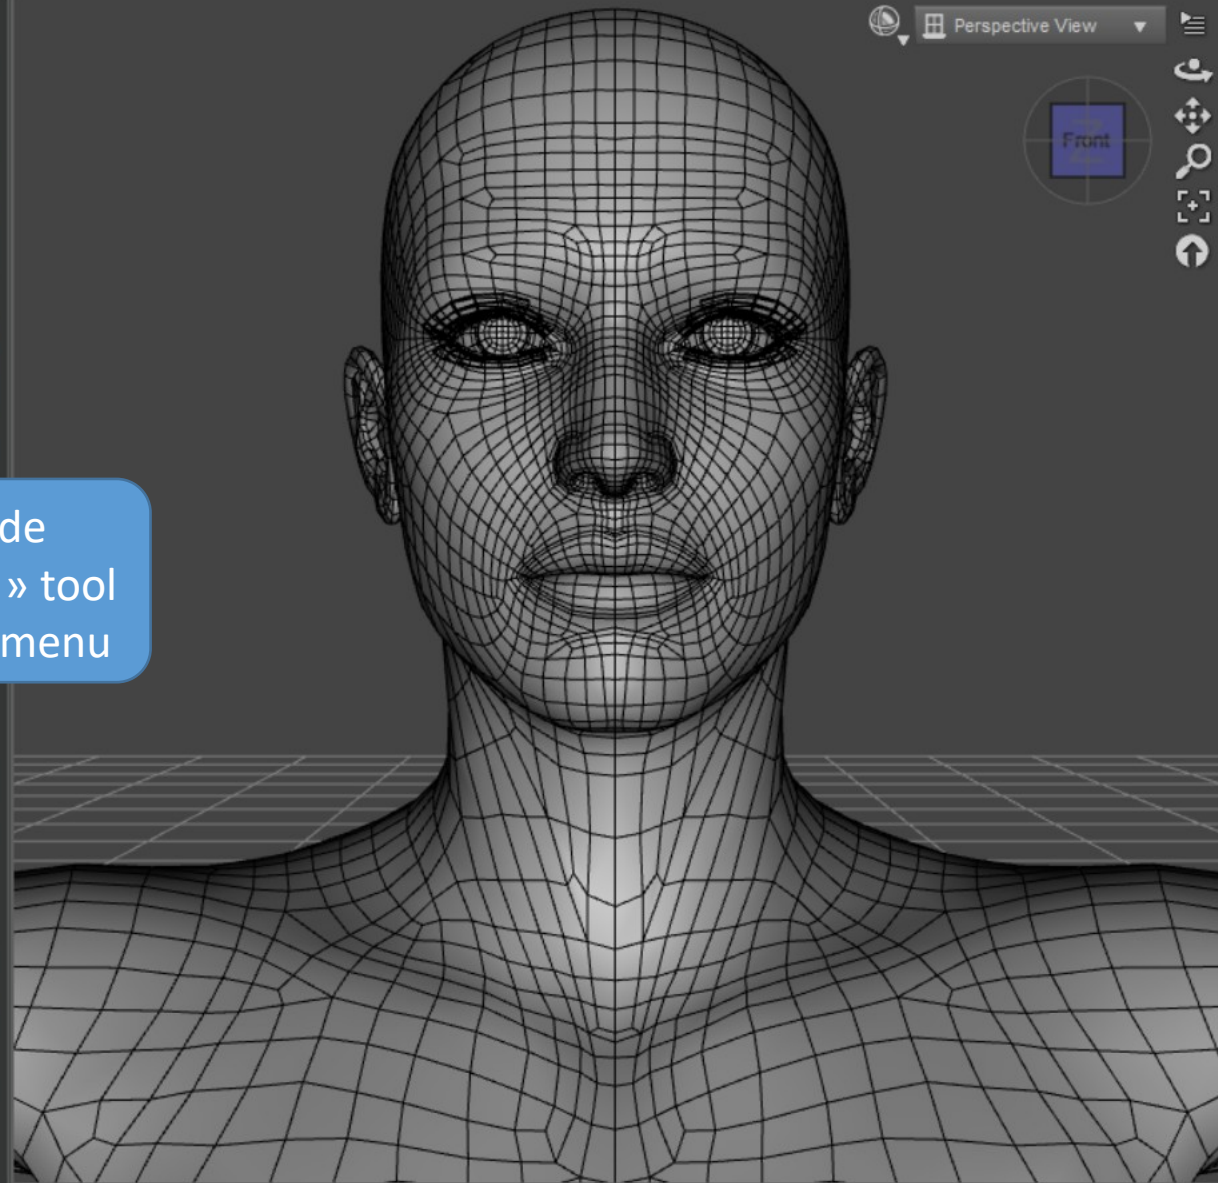

This tutorial guides you to discover the « Reference Vertex » of a D-Former, for use in Character Splitter

Tool	Shortcut
Scene Navigator	Alt+Shift+F
Node Selection	Alt+Shift+V
Universal	Alt+Shift+U
Rotate	Alt+Shift+R
Translate	Alt+Shift+T
Scale	Alt+Shift+S
Surface Selection	Alt+Shift+M
Region Navigator	Alt+Shift+N
Joint Editor	Alt+Shift+J
Geometry Editor	Alt+Shift+G
Spot Render	Alt+Shift+C
<b>Node Weight Map Brush</b>	<b>Alt+Shift+W</b>
ActivePose	Alt+Shift+P
aniMate2	Alt+Shift+A

Select the « Node Weight Map Brush » tool from the « Tools » menu

Enter text to filter by...

Scene

- V S Node
- Genesis
- Hip
- D-Former\_1\_Base**
- D-Former\_1\_Field

Active Tool: Universal

Use Local Coordinates

Manipulator:

Line Width: 1 Home Menu: Enable Pins Menu: Enable

Translate:

X Y Z

Rotate:

X Y Z Free

Scale:

X Y Z Uniform

Guides:

Snapping:

Translate: 50cm Rotate: 15° Scale: 10%

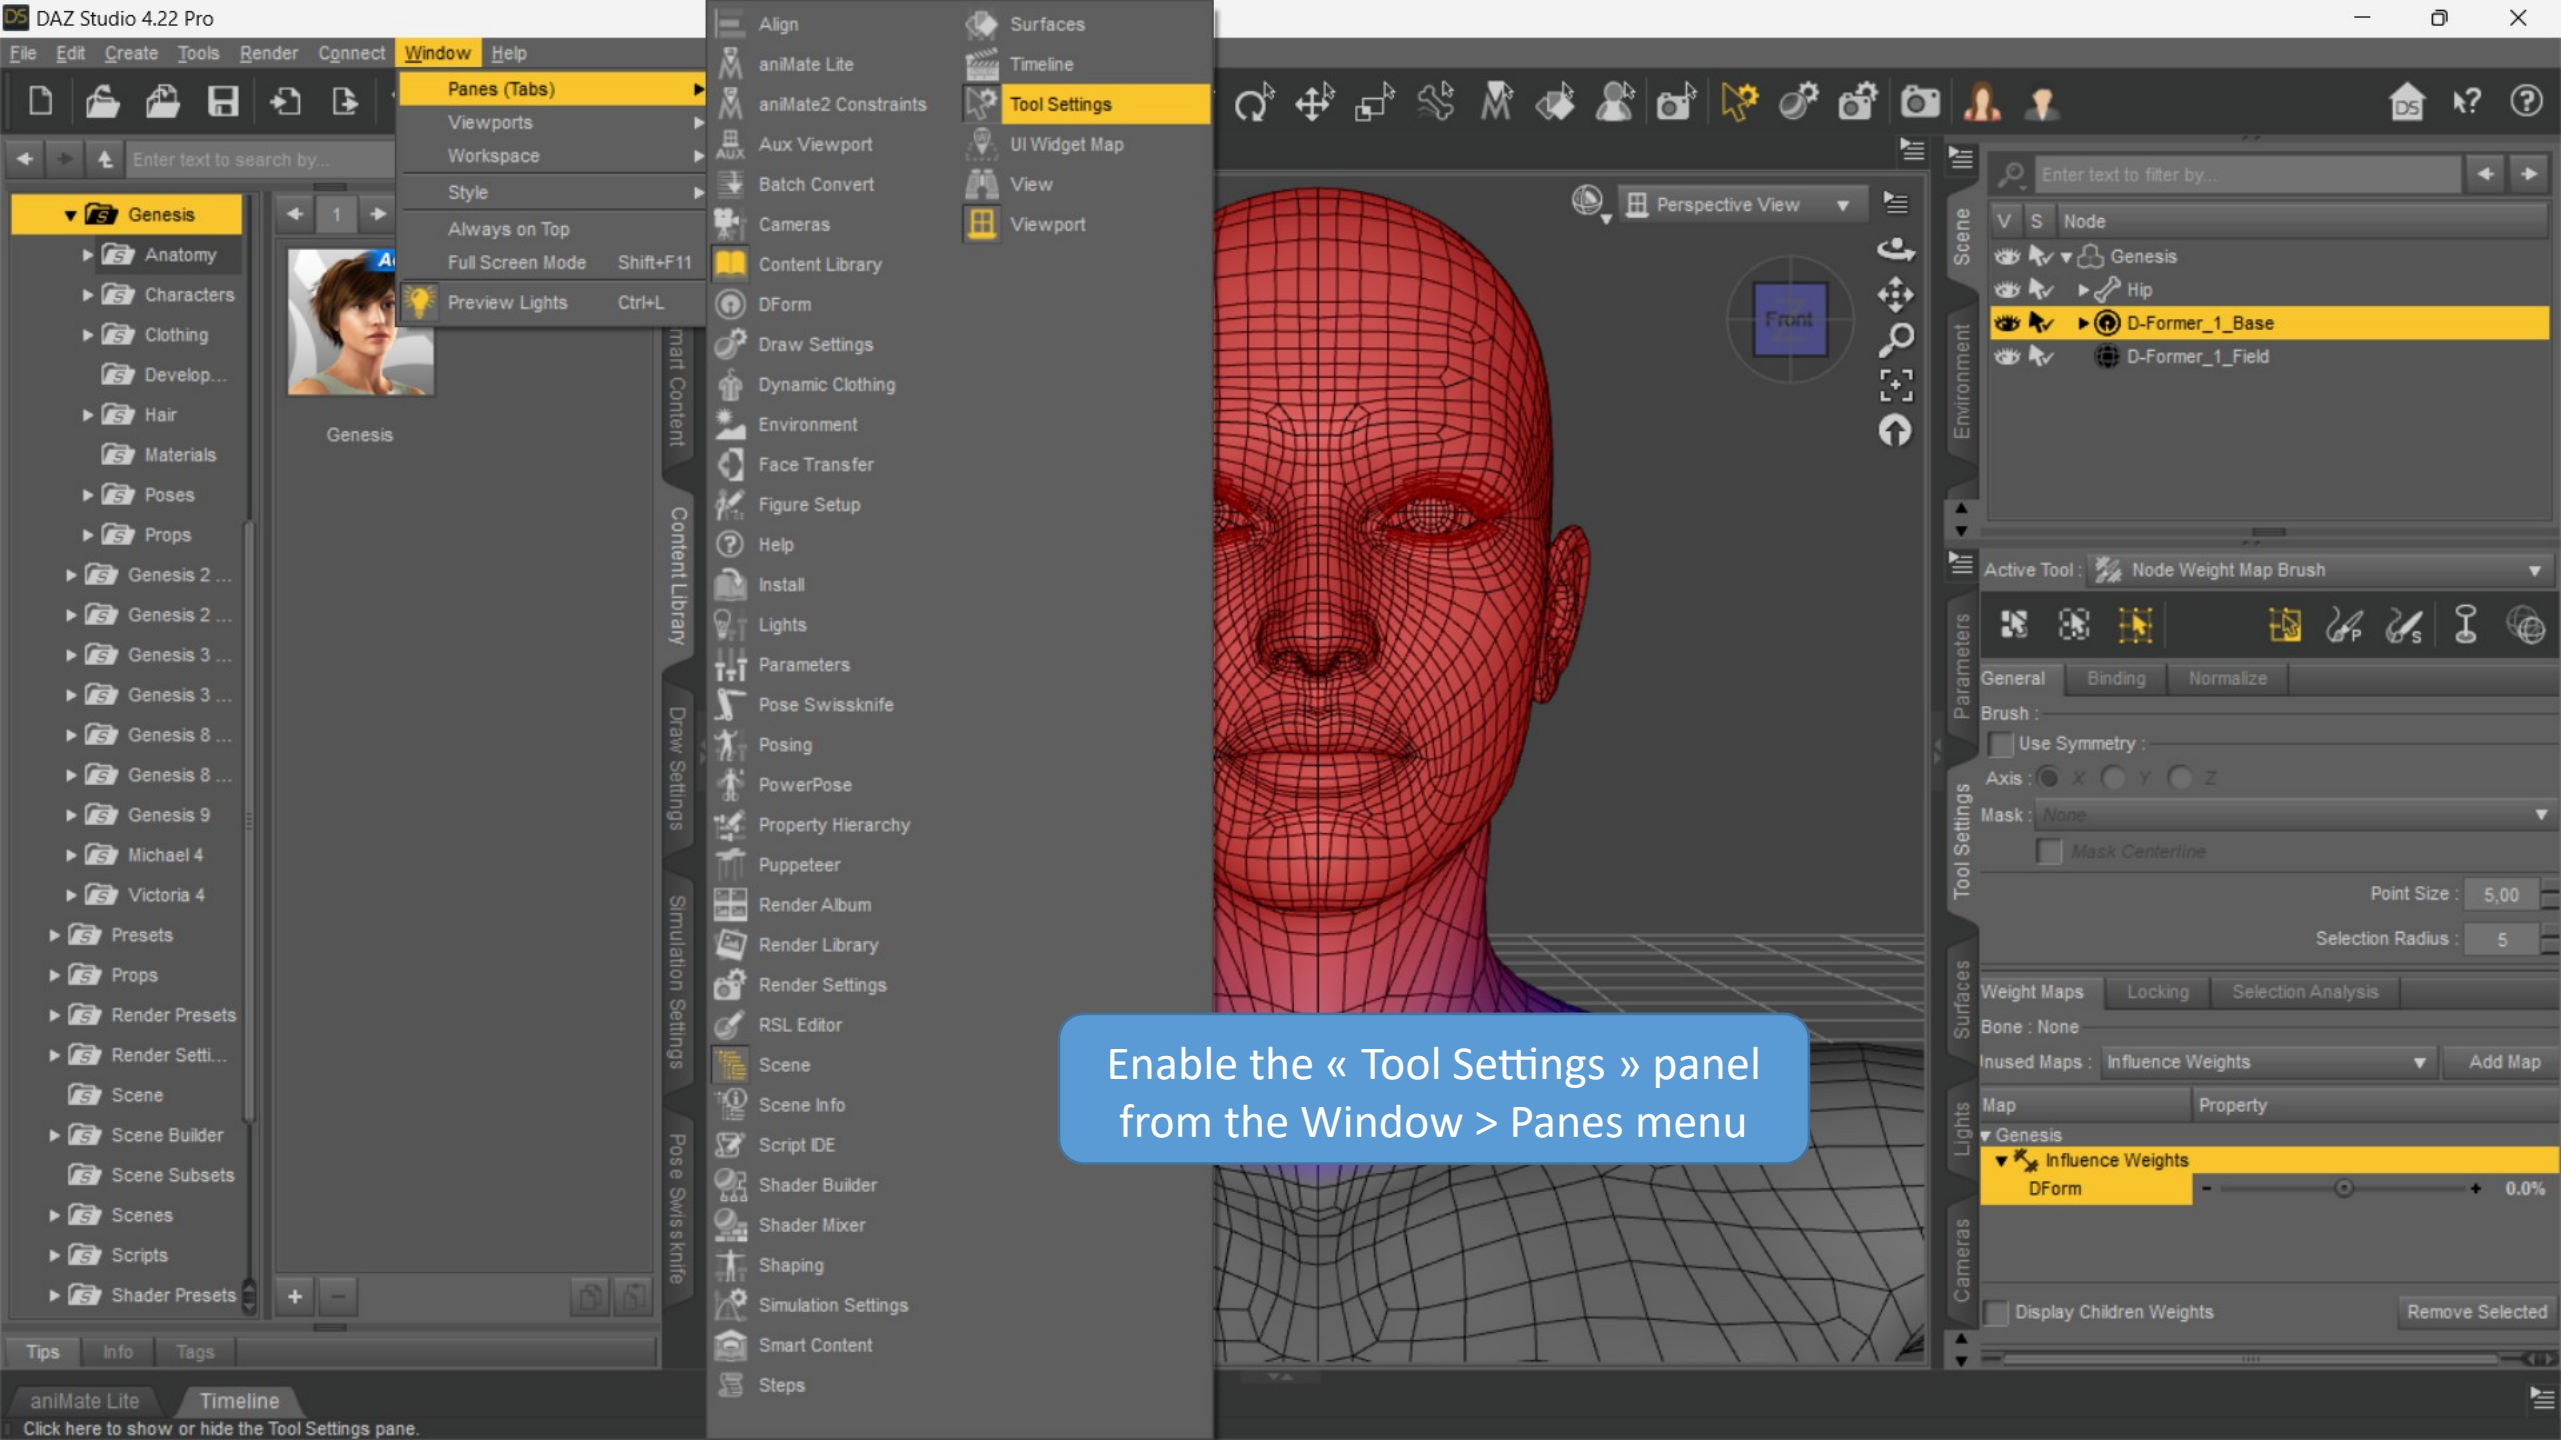

Node Selection Mode:

Node

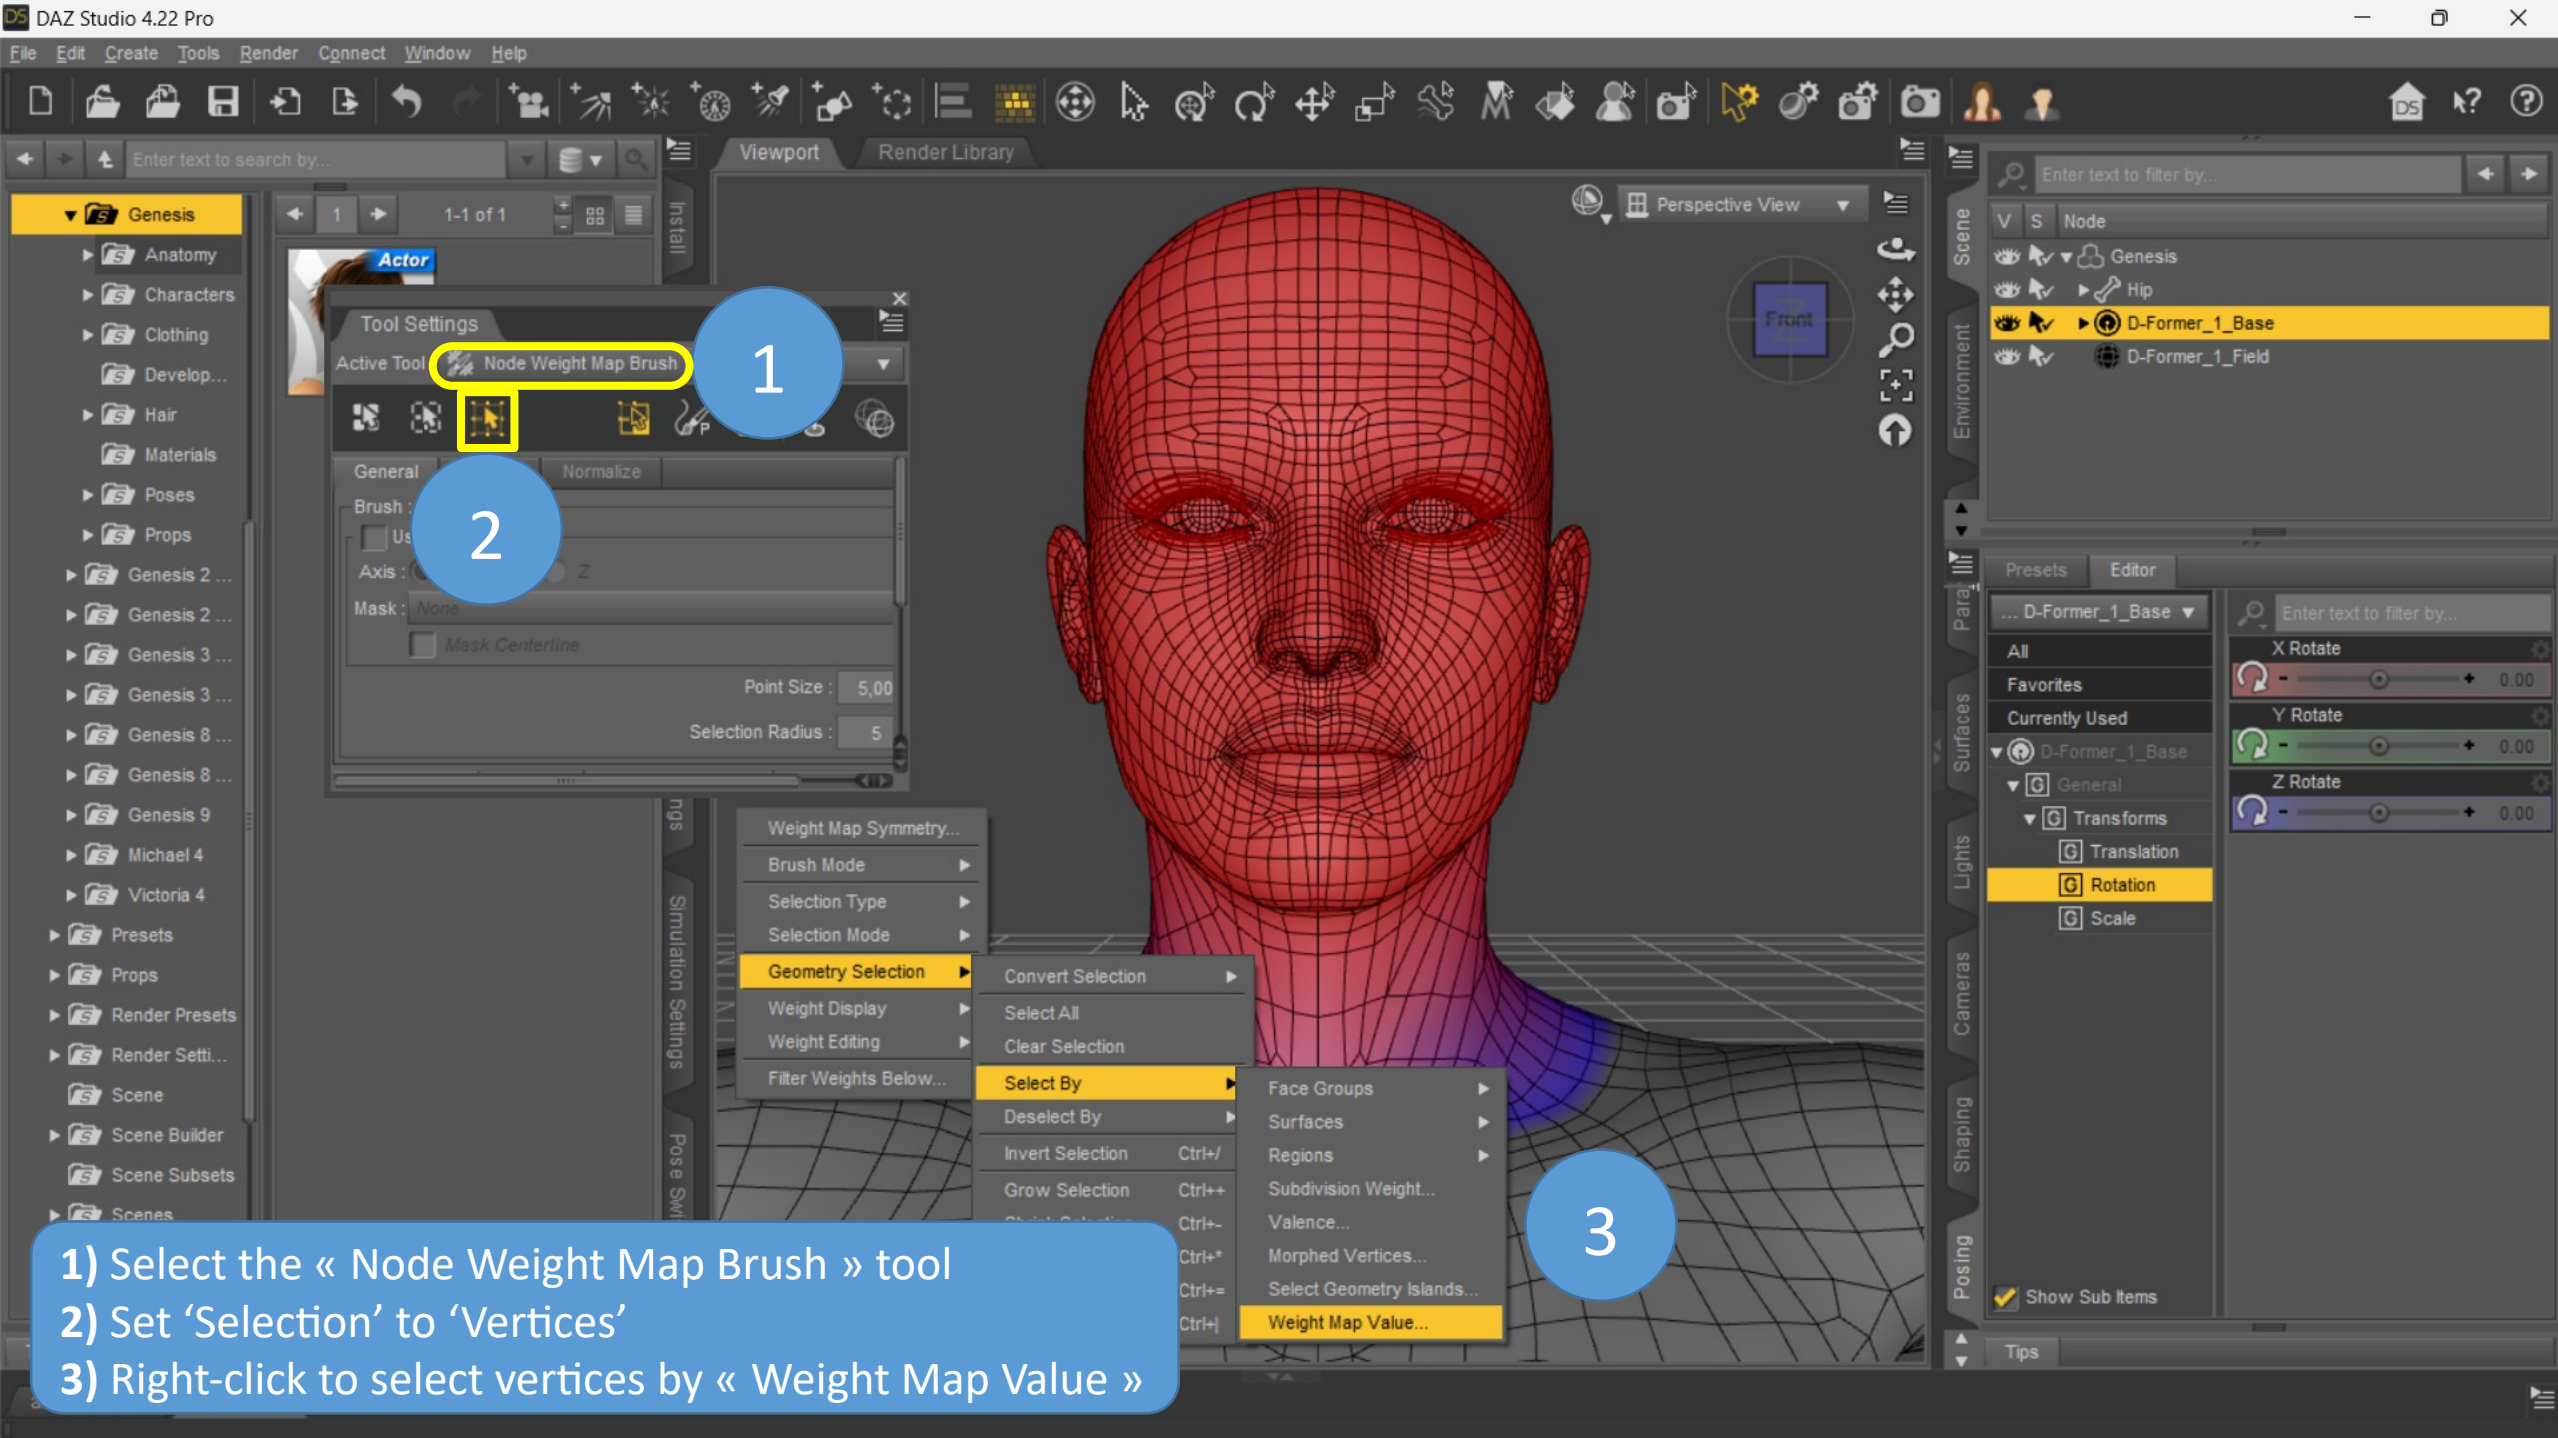

Secondary Nodes:

Translate Rotate Scale

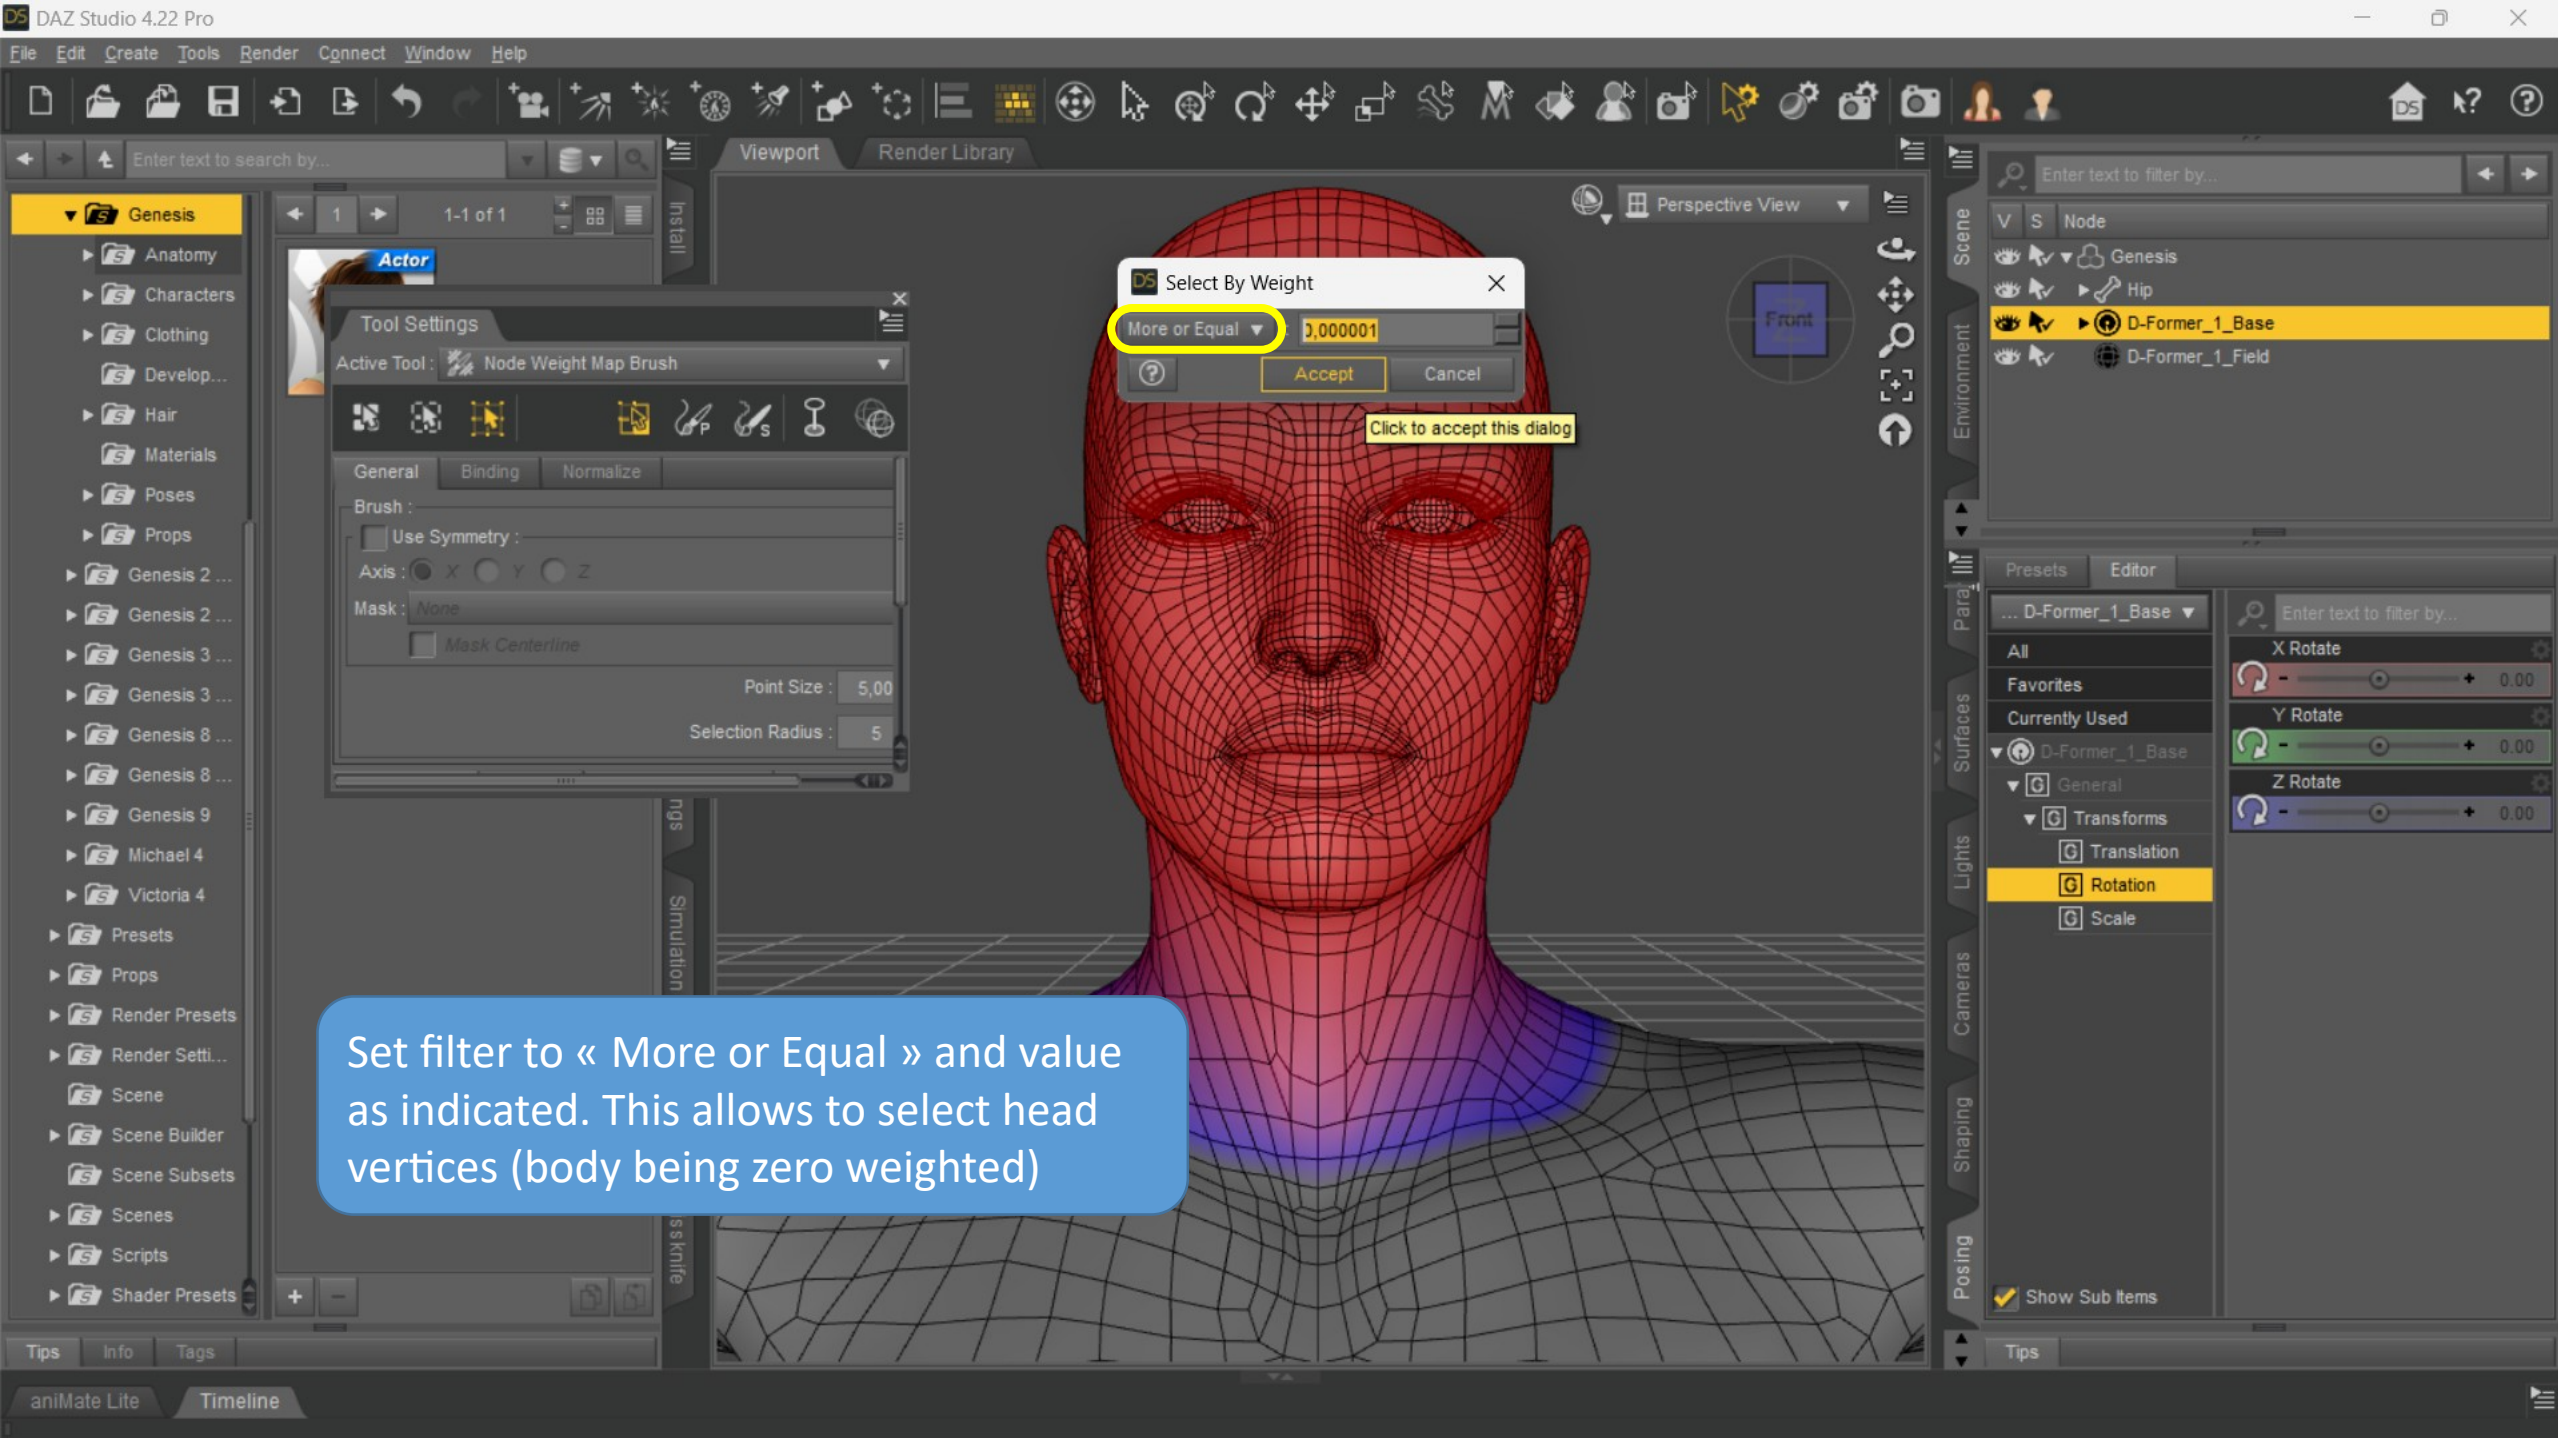

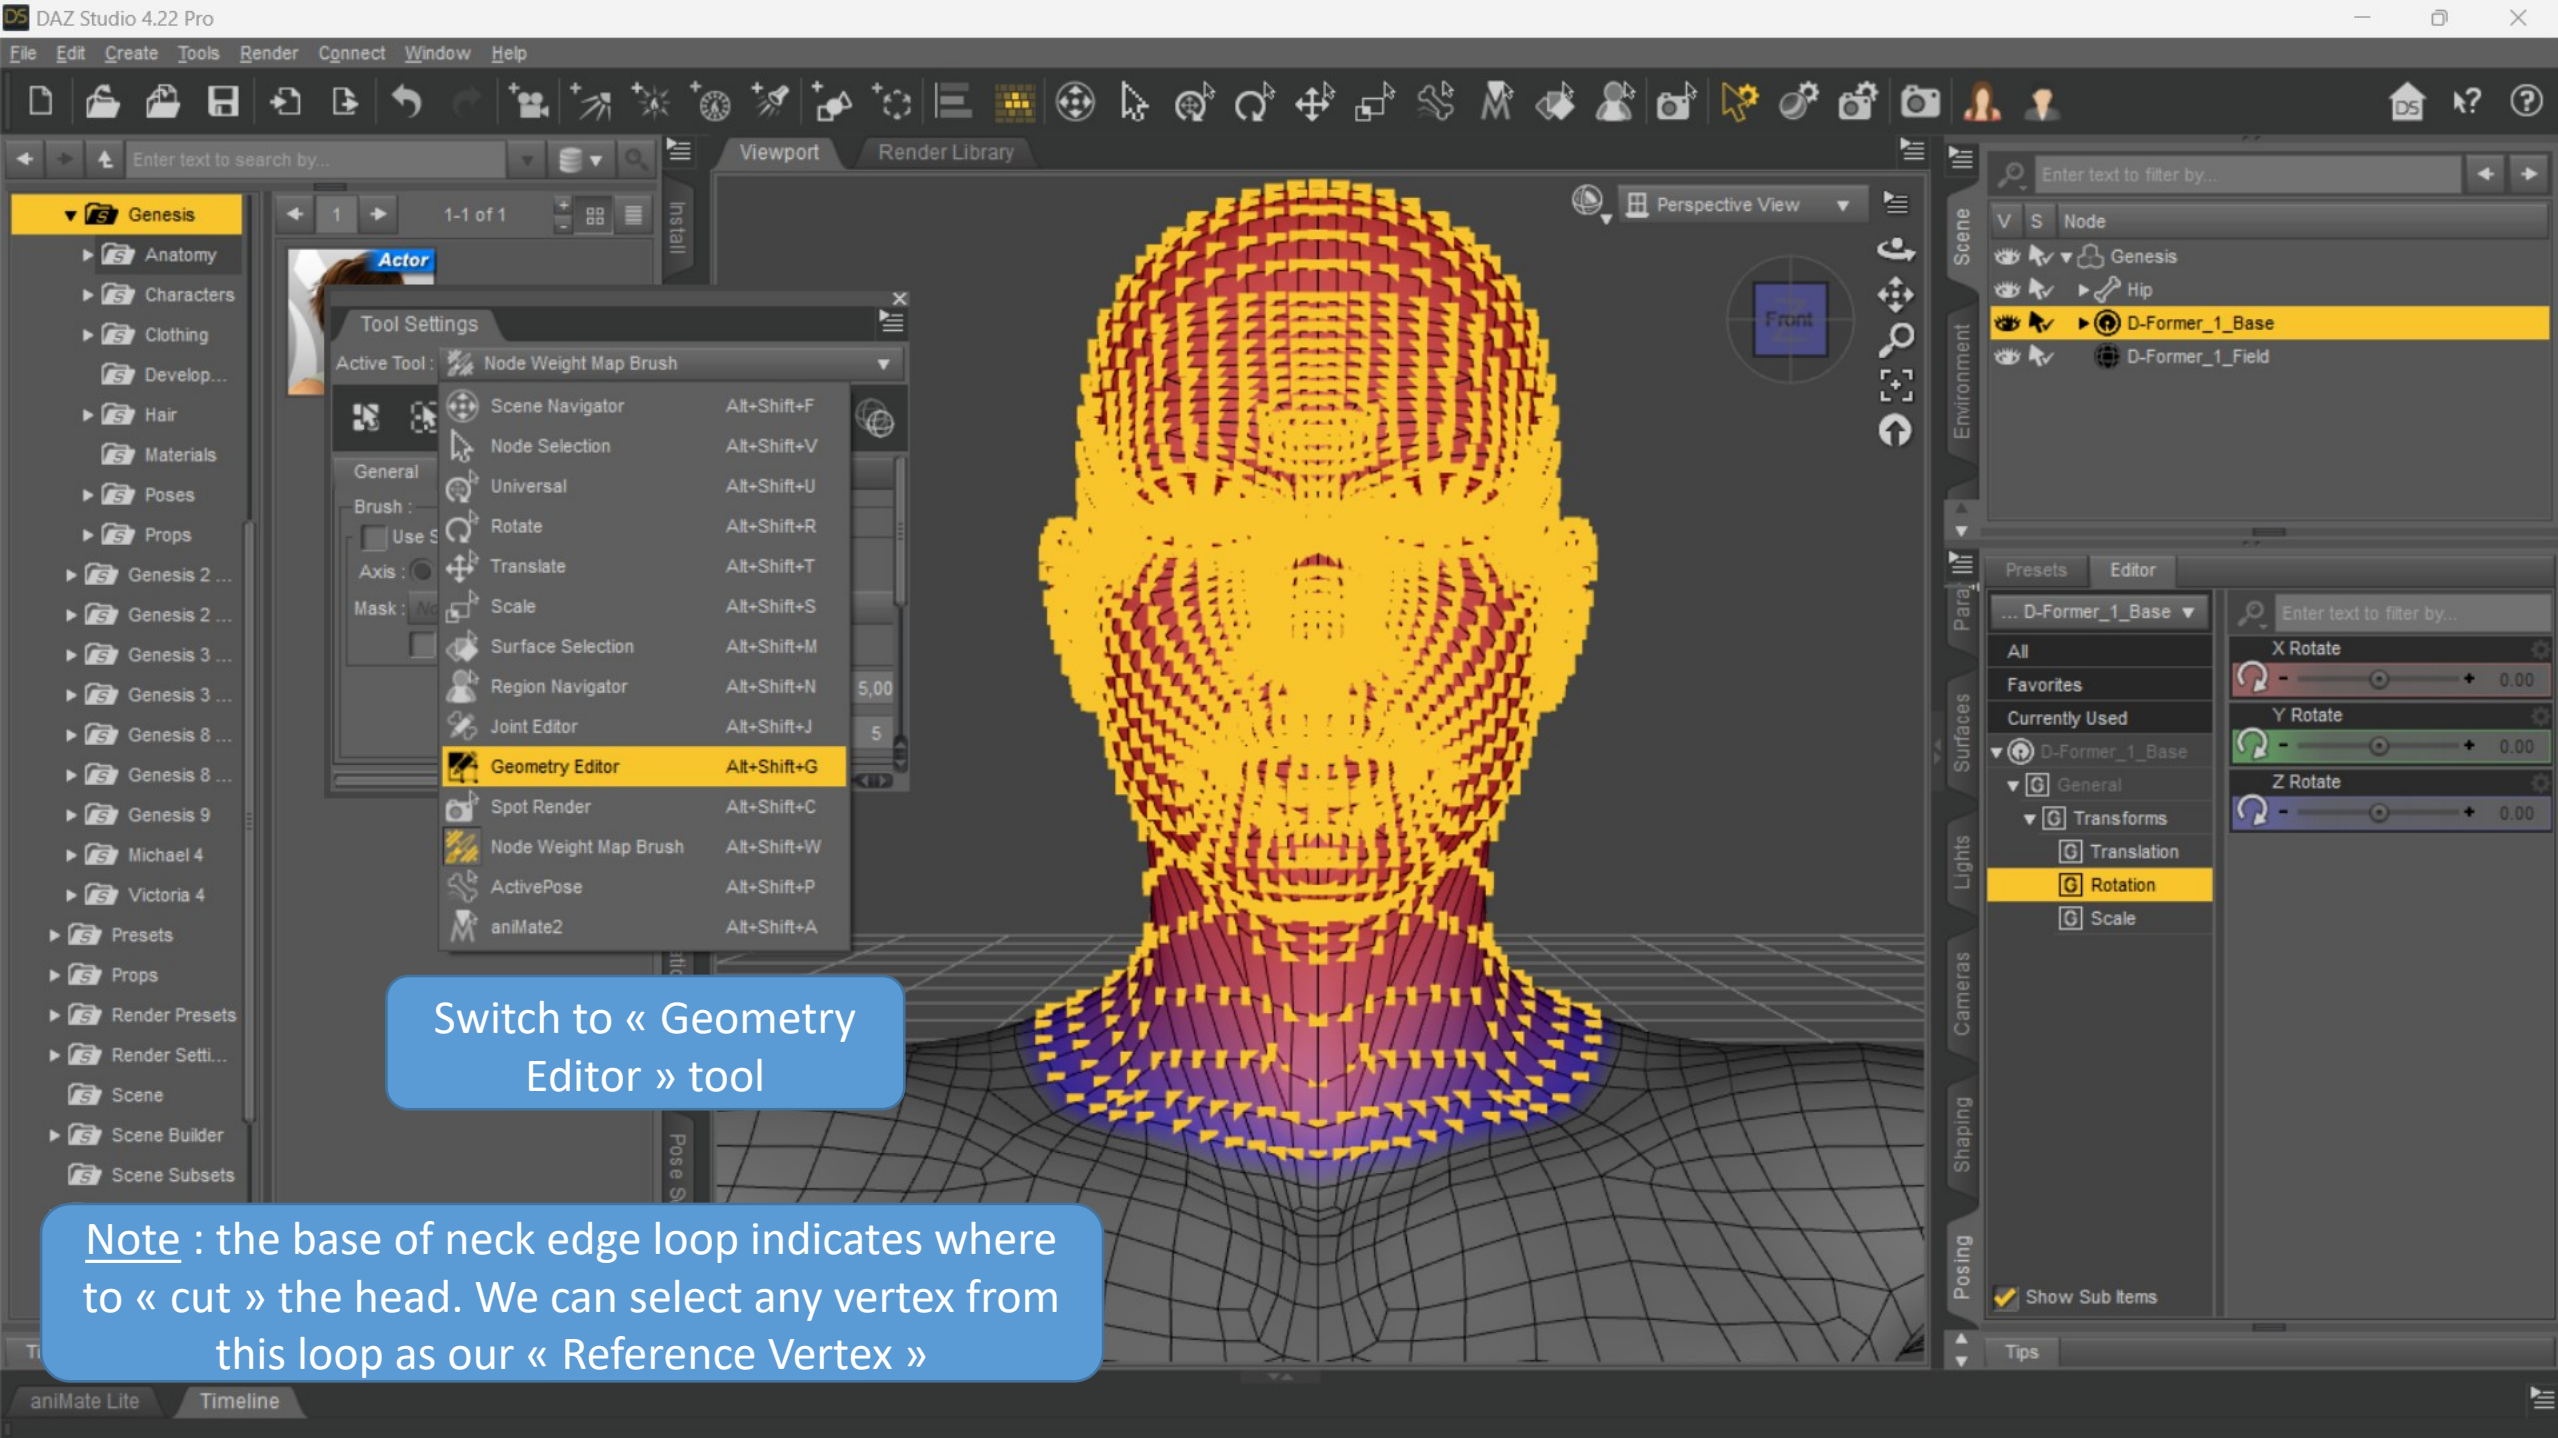

Enable the « Tool Settings » panel  
from the Window > Panes menu

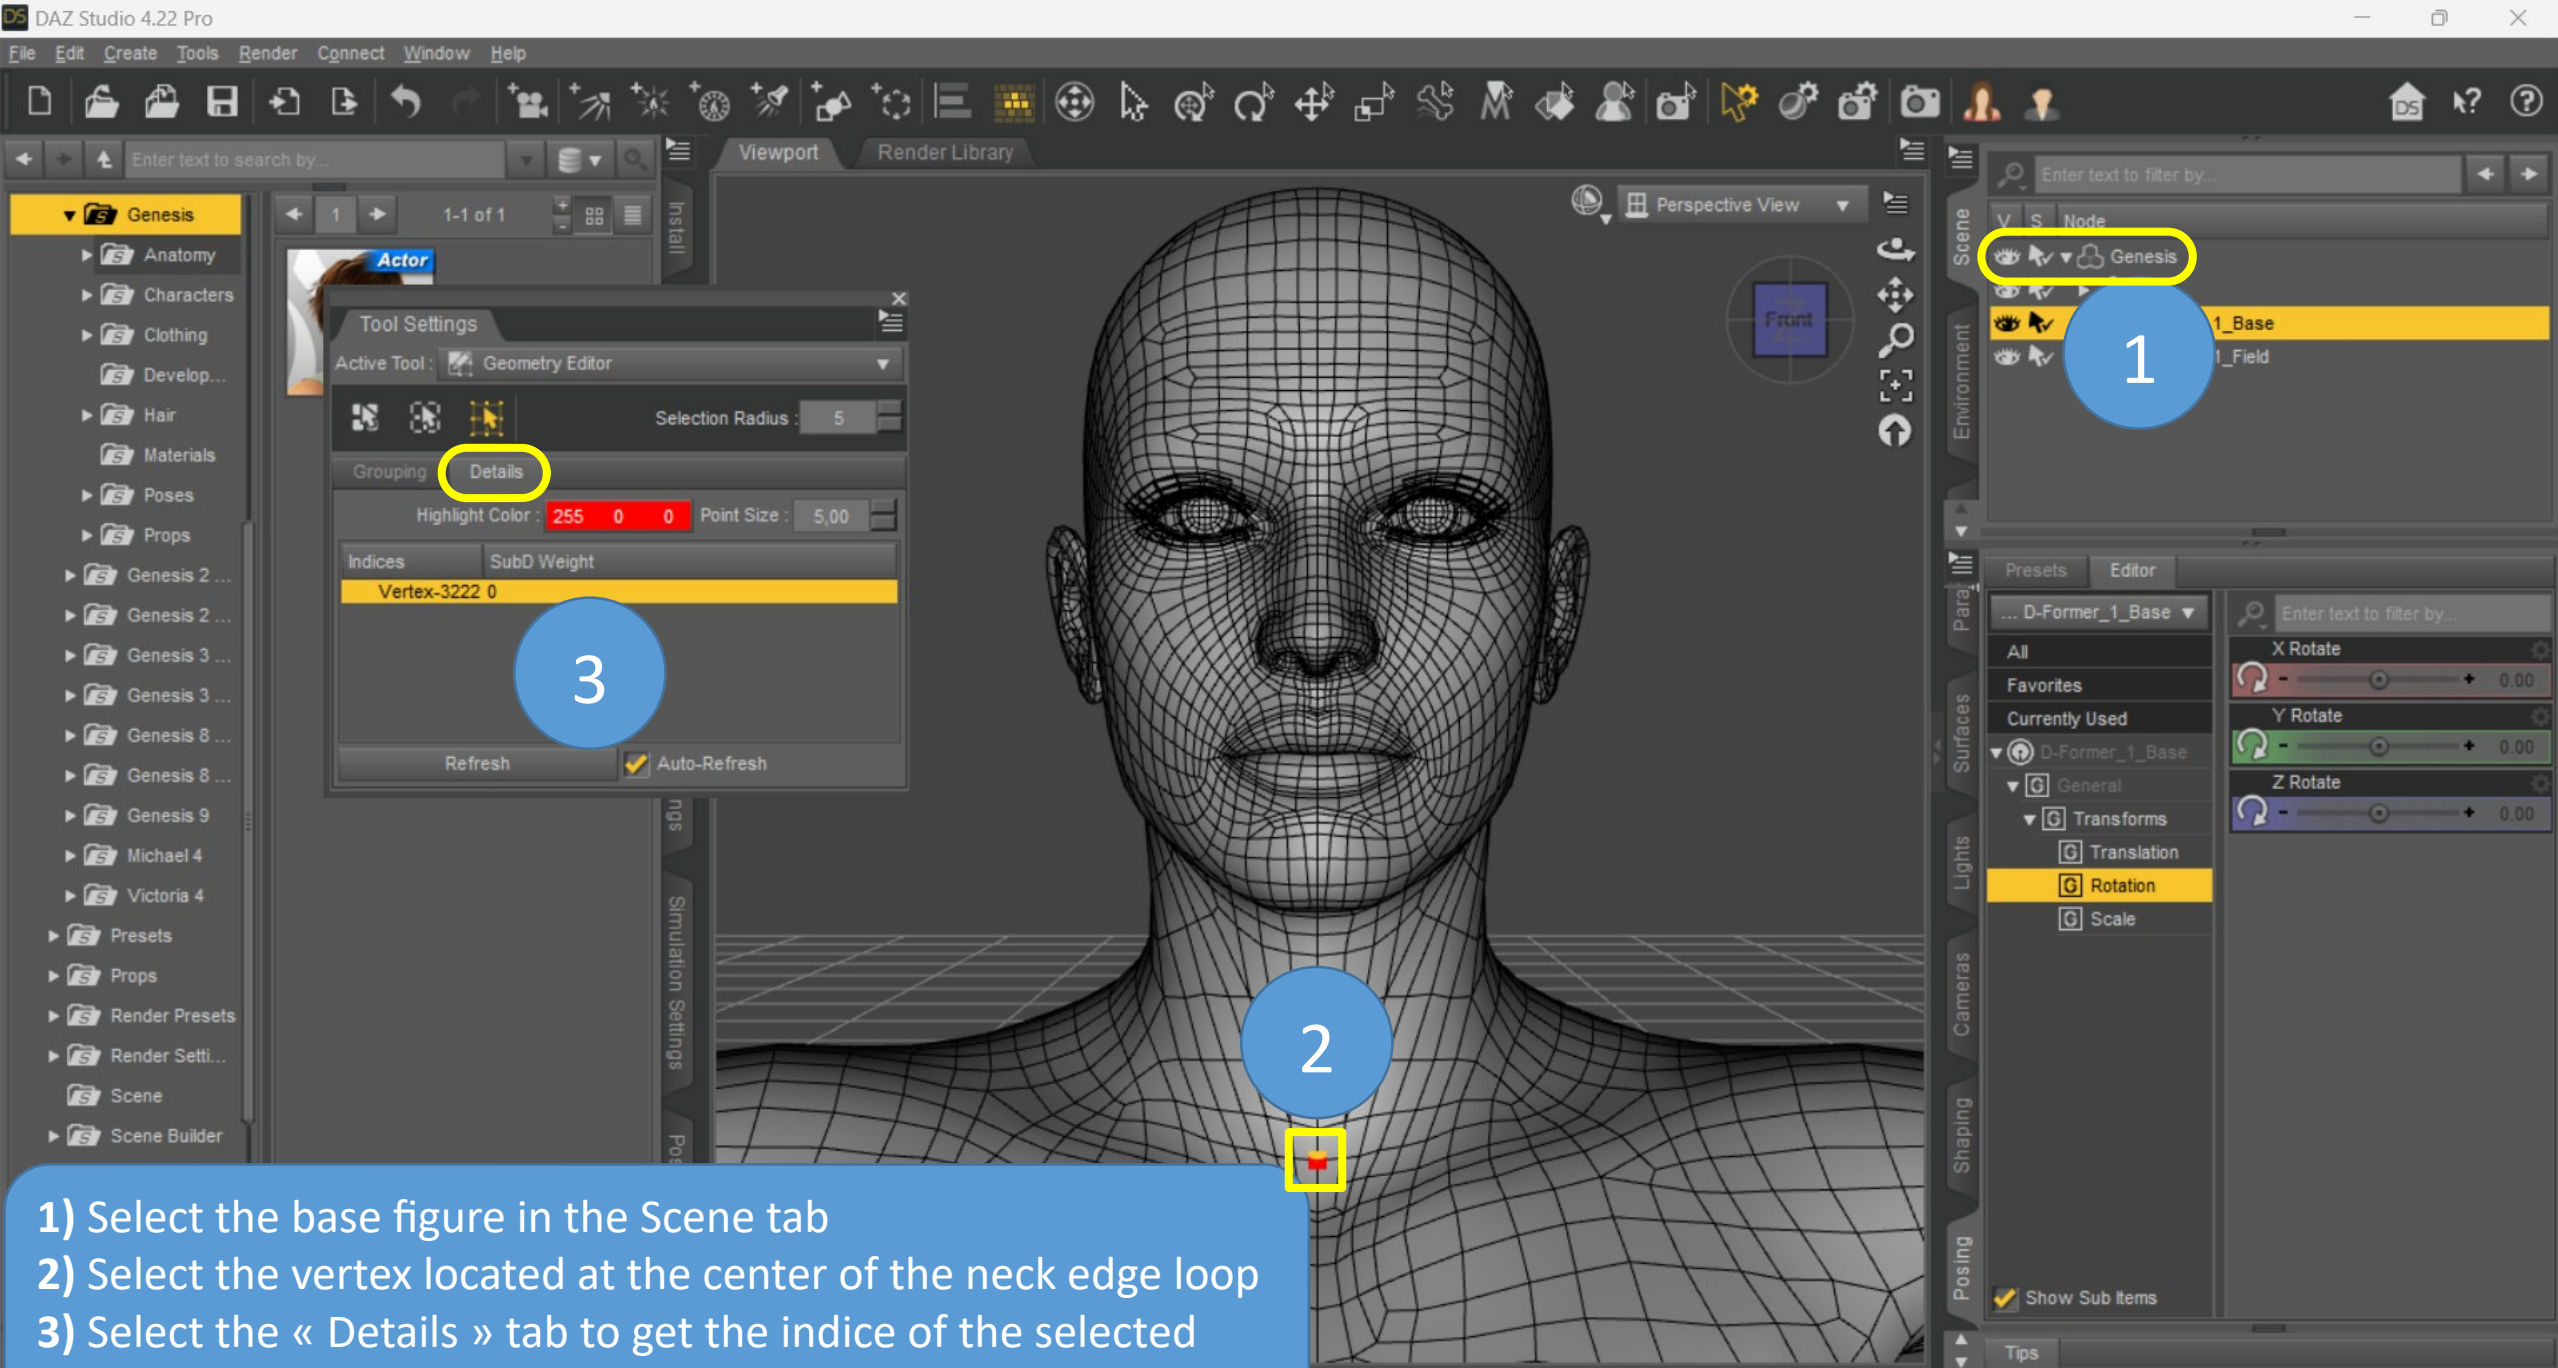

- 1) Select the « Node Weight Map Brush » tool
- 2) Set 'Selection' to 'Vertices'
- 3) Right-click to select vertices by « Weight Map Value »

# Setting the « Reference Vertex » in Character Splitter

In the « Body » tab, simply set the « Vertex » field to the vertex indice you identified previously.

If you want to make this change permanent, you can hard-code it in the SetRefVert() function of the script (Character Splitter.dsa file)
