

We apply the morph deltas only for the head

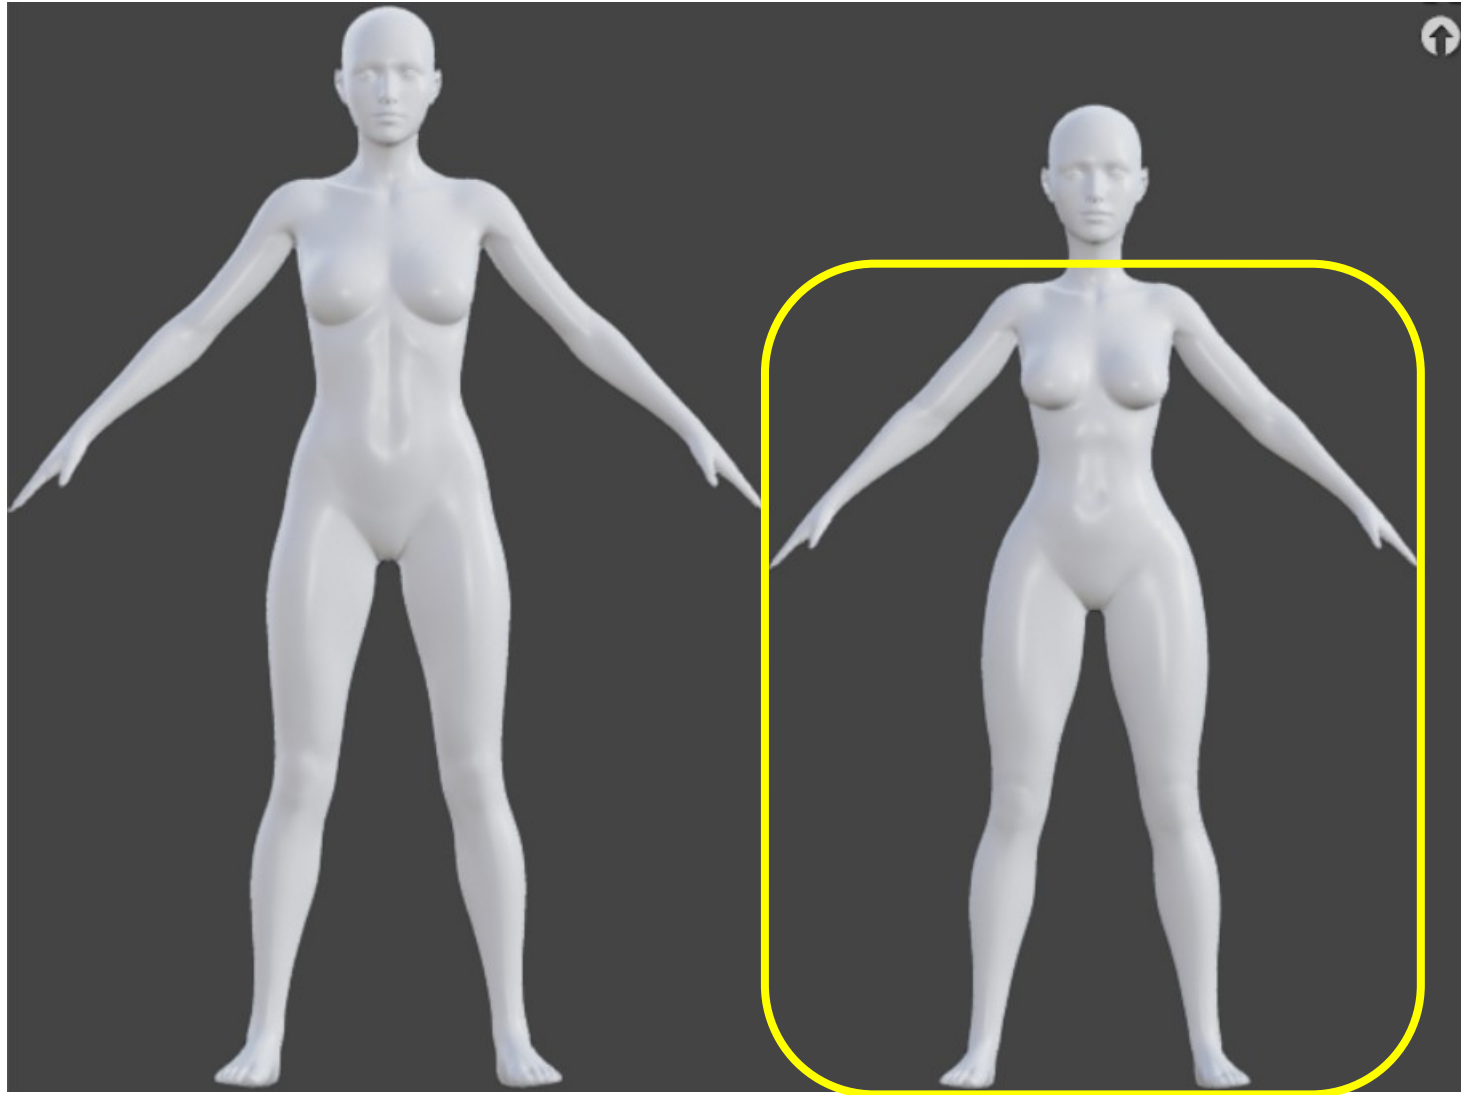

- ❖ We use the reference vertex (#3127) to lift the head at neck level
- ❖ We can now adjust rigging to shape, freeze the properties and save as morph asset

We apply the morph deltas only to the body

We use the reference vertex (#3127) to lift the body at neck level

- ❖ We bring the figure back to floor by translating its root bone (Hip)
- ❖ We can now adjust rigging to shape, freeze the properties and save as morph asset
